# FOREWORD

Gas is a clean, convenient, and safe energy resource. With this in mind, TPA has placed its concentration on manufacturing a diverse series of related products for 40 years – from key components, such as valves and regulators, to more complex products such as barbecues and cylinders. The determination to establish its place in the industry, and the vision to recognize potential market trends, has allowed TPA to succeed in the areas of outdoor leisure, LPG componentry, and heating.

For the past 10 years, TPA has aggressively transformed its business model from OEM to ODM, to OBM status. The company not only has an advantage with its rich experience in manufacturing, TPA also has strong design capability. In the next year, TPA is bringing the company a step forward by introducing its own brand into the market, which will mark another milestone in the company's history.

TPA will continue to evolve along with the changes in the global market, and seek improvement and growth wherever necessary, but the company's dedication to product quality, as well as after-sales service, will never change. We welcome any future opportunities to collaborate with different companies to grow together with TPA to create the triple-win between the manufacturer, the clients, and the consumers.

瓦斯是一種清潔、方便且安全的能源。TPA成立至今已四十年，從閥、調整器的核心部件到鋼瓶、燒烤爐等，創造了一系列以瓦斯能源為基礎的應用產品，成功橫跨了戶外休閒、液態石油氣、取暖爐等三大事業領域。這是TPA不斷著眼於當前市場主流與未來市場趨勢的成果！

過去十年來，TPA積極地從OEM轉型為ODM乃至於OBM型態，憑藉豐富的生產製造經驗與自主開發、設計能力，在2010年，我們正式踏入了自有品牌市場，也為TPA歷史劃下嶄新的里程碑。

隨著全球市場的變遷，TPA將會持續追求成長與改變，唯一不變的，是對於產品質量的堅持、以及即時的售前售後服務能力。在此，我們衷心歡迎各地的夥伴一同與TPA成長，創造供應商、客戶、消費者的三贏局面！

Established in 2003, TPA Dongguan is a manufacturer of barbecues, camping, and gas related appliances. Located in Huangjiang Town, Dongguan City, the factory covers an area of 160,000 square meters and has more than 800 employees. As planned by the local government, this site will be the future location of a barbecue industrial park complex with warehousing storage space of 400 shipping containers. TPA is currently adjusting its product mix while it integrates its plants as well. Once this is completed, the total production should reach 500 containers monthly.

TPA DG has production equipment and facilities to perform a wide array of processes, including stamping, welding, painting, product assembly, and direct shipment of consolidated containers. TPA also has advanced product development capability through its product development team. Additional resources include a tooling workshop, a prototyping center, a designing team and a CSA-approved testing laboratory. All of these skills and services form the core of TPA product development and manufacture.

TPA is a "One-Stop Shop", offering global clients a complete product range from gas and charcoal barbecues and accessories, to camping and heating appliances. TPA's status as a major global supplier is exemplified by its "Advantage Supplier" designation from Kingfisher, the sourcing unit for two of the world's largest DIY retailers, B&Q and Castorama. TPA also holds several internationally recognized accreditations, such as ISO9001, for its management system, and FSC COC, for its responsible management of wood in the supply chain. Also, in May 2010, TPA passed the BSCI social compliance audit. These accreditations show TPA's commitment towards maintaining high internal operational standards.
